DETAILED ACTION

Drawings

1. Figure 25 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

2. Claims 1-43 are allowed.

3. The following is an examiner's statement of reasons for allowance:

The present invention provides a new apparatus and method for subband forming, wavelet conversion, subband synthesizing, data coding and decoding, in which a parallel processing is employed to efficiently increase the speed of data compression operation (specification, line 20 of page 3 - line 1 of page 4). In particular, the new apparatus and method comprise the following features, which the prior art, either taken singly or in combination, does not teach:

- wherein each of said plurality of memory locations also stores at least one signal in addition to the stored regional signal, said at least one signal including a copy of at least one of a leading portion and trailing portion of another regional signal stored in another memory location corresponding to a divided portion of the input signal originally bordering the divided portion of the input signal

corresponding to the particular regional signal (see independent claims 1, 15, 18, 22, 26, and 30);

- a regional divider configured to perform a regional division in which said wavelet conversion coefficients are divided into a plurality of coefficient groups in accordance with conditions such that coefficients existing in a spatial location are sorted into a corresponding group (see independent claim 34, 36, 38, 40, 42, and 43).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
